Juan Berrio

DATA ENGINEER · BI ANALYST · PROCESS AUTOMATION

+57 319 617 3131 · juandyb99@gmail.com · linkedin.com/in/juanberrioo · github.com/juanberrio0399 · Bogotá, Colombia · Remote / Hybrid (GMT-5)

Stack: SQL · Python (Pandas) · Automation · RPA (Playwright) · Power BI · DAX · ETL/ELT · SQL Server · DuckDB · Parquet · Docker · Terraform · GitHub Actions · Cloudflare (Workers, R2, Pages, D1, Vectorize) · AWS

Data engineer and BI analyst with **3+ years in ETL pipelines, BI and data modeling**, on a **6-year professional foundation**. Strong core in **SQL, Python and Power BI**: I automate the ingestion, cleaning and consolidation of data from multiple sources (SQL Server, Excel, SharePoint, CRMs, APIs, Google Sheets), model analytical warehouses (**dimensional modeling / Star Schema, DAX**) and deliver reliable, automated reporting. Today I run a production warehouse of **36M+ records** and automations that replace manual work for the operations team. Measurable impact: **–30% reporting time** and **–40% SQL query time**. Currently pursuing a **Systems Engineering** degree and the **AWS Cloud Practitioner** certification.

TECHNICAL SKILLS

- **Languages & Databases:** SQL · Python (Pandas) · SQL Server · Relational & NoSQL databases · DuckDB
- **Data Engineering:** ETL/ELT pipelines · Incremental ingestion · Data cleaning & quality · Dimensional modeling (Star Schema) · Data Warehousing · Parquet
- **BI & Analytics:** Power BI · DAX · Power Query · Dashboards · Advanced Excel · Automated reporting
- **Cloud & DevOps:** Cloudflare (Workers, R2, Pages, D1, Vectorize, Workers AI) · AWS (in progress) · Docker (non-root images, GHCR publishing) · Terraform and AWS CDK (IaC) · GitHub Actions (CI/CD) · Supply-chain security (Trivy, Checkov, cdk-nag, SBOM)
- **Automation:** Power Automate · Playwright (RPA) · API integration
- **Learning:** dbt · Apache Airflow · Spark · AWS Solutions Architect

PROFESSIONAL EXPERIENCE

Data Engineer (Data & Automation Developer) — Courier Box · Bogotá · Jul 2025 – Present

- Designed and operate a **production ETL pipeline** (Python, DuckDB, Parquet) with **incremental ingestion of 13,000+ Excel files**: the warehouse now holds **36M+ records** (~1.5 GB of Parquet, 9 tables) and only reprocesses what changed.
- Built **shipment-level tax reconciliation** across **5 sources** (settlements, manifests, payments, tax forms and import declarations), showing what was paid to the tax authority and what the client reimbursed.
- Developed a **settlement validator** that independently recomputes freight, CIF, duties and VAT and flags differences, pending payments and duplicates; published in a web console (React + DuckDB-WASM).
- Shipped **executive dashboards in the cloud** (Cloudflare Pages + R2, access-restricted with Cloudflare Access): operations control and **per-client SLA compliance** (95% and 98% targets), with an **automated freshness check** (GitHub Actions) that alerts when any dataset is older than 30 hours.
- Automated with **RPA (Playwright)** the **download of manifests** from the customs portal and the **upload of documents** to an international marketplace portal, matching records by business rules.
- Delivered **8 one-click tools** for the non-technical operations team: sorting settlements into folders, extracting data from PDFs inside ZIPs, tracking taxes and payments, cleaning shipments and refreshing the pipeline; each one **checks the machine and validates the data before running**.

- Integrated **fully cloud-based flows** (Power Automate + GitHub Actions) for operations, incidents, receivables and invoicing, with **automated tests and secret scanning** on every change.
- Modeled client consolidations and the **profit report** by rate and weight band in **Power Query**.

Data Analyst — Market Mix · Bogotá · Oct 2022 – Feb 2025

- Developed **ETL pipelines** consolidating data from **SQL, SharePoint, Excel, CRMs and Google Sheets**.
- **Cut reporting time by 30%** with **automated Power BI dashboards**.
- **Optimized SQL queries** for up to **40% faster response time**.
- Automated data cleaning and consolidation, **saving 2–4 hours daily**.

Collections & Portfolio Management Analyst — Microbank · Bogotá · Feb 2022 – Oct 2022

- **Increased portfolio recovery by 25%** through **payment-behavior and delinquency analysis** (SQL/Excel).
- **Reduced CRM data-entry errors by 30%** with automated validations.

Customer Service Supervisor — Market Mix · Bogotá · Jun 2018 – Feb 2022

- Led customer-service teams; **95% quality compliance** and **+15% satisfaction**.
- Analytical foundation: reporting and KPI tracking in Excel.

FEATURED PROJECTS (PUBLIC)

Serverless RAG assistant — live

- AI that answers **only from the loaded documents** (says "I don't know" otherwise): **Cloudflare Workers AI + Vectorize + D1**, reranker, rate limiting, tests in the real runtime and CI on every PR. ~$0 infrastructure. serverless-rag-assistant.tienvo.workers.dev

Interactive portfolio with SQL playground

- Site running **DuckDB-WASM in the browser** to query real data from my repositories with no backend; Lighthouse and OpenSSF Scorecard in CI. juanberrio0399.github.io

Containerized data tool

- Python CLI with **schema validation (pandera)**, two-stage non-root Docker image, **Trivy** blocks vulnerabilities and it ships to **GHCR with a signed SBOM**. github.com/juanberrio0399/dockerized-data-tool

EDUCATION

- **Systems Engineering** (in progress) — Corporación Universitaria Americana
- **Technical Diploma in Software Development** — Fundetec
- **Technical Diploma in Administrative Assistance** — SENA

CERTIFICATIONS

- **AWS Cloud Practitioner Essentials** — AWS Training & Certification
- **AWS Certified Cloud Practitioner (CLF-C02)** — in preparation
- **Python Programming** — Code Avengers

LANGUAGES

- **Spanish** — Native
- **English** — Intermediate technical reading · basic conversational (improving)
